EDUCATION

Middle School Diploma
Luigi Einaudi Comprehensive Institute

09/2018 – 06/2021 | Marone (BS)

Completed lower secondary education with a focus on general subjects.

PROJECTS

Summer School – Mathematics & IoT (San Pellegrino)

Organized by the University of Bergamo, Participated in a 3-day summer school focused on mathematics and artificial intelligence, exploring models and algorithms for machine learning systems. The program included lectures and laboratory activities aimed at developing scientific thinking and applying mathematical concepts to real-world and technological contexts.

PROFESSIONAL EXPERIENCE

Intern
O.M.F.B. S.p.A.

04/2024 – 05/2024 | Provaglio d'Iseo

During this internship, I worked in a production environment where I was involved in the assembly of hydraulic components such as pumps, tanks, and control units. I also supported packaging activities and the preparation of finished products for shipment.

Intern
Erasmus+ Programme/VET Mobility Project

02/02/2025 – 23/02/2025 | Seville, Spain

During an Erasmus+ VET internship abroad, I improved my ability to adapt to new environments and situations. I developed stronger communication skills and learned to work more effectively with different people. The experience also helped me become more independent, responsible, and confident in unfamiliar settings.

Intern
O.M.F.B. S.p.A.

10/11/2025 – 27/11/2025 | Provaglio d'Iseo

During this advanced internship in the Technical Office (O.M.F.B.'s Tank Division), I worked within the engineering and design department under the supervision of the Technical Team Manager and the engineering team. I mainly focused on mechanical design activities using *SolidWorks*, developing and modifying 3D *models* and *technical drawings*. I also gained further knowledge of mechanical engineering topics and production processes. Resulted in strengthened CAD skills, problem-solving abilities, and understanding of product development workflows.

Waiter (Part-time/Casual work)
Osteria Camplani

27/08/2024 – Present | Zone (BS)

Currently working in a customer service environment, handling orders, table service, and direct customer interaction. Developed strong communication skills, responsibility, teamwork, and time management while working in a fast-paced environment.

Me.Mo Project – Higher Education Excellence Schools

Selected for the Me.Mo program, participating in a 3-day experience between the Sant'Anna University and the Scuola Normale Superiore in Pisa. The project focused on academic orientation, scientific thinking, and exposure to advanced study environments.

UNIMI Winter School – Università degli Studi di Milano (Uni.On Program)

Participated in the Uni.On Winter School program promoted in collaboration with the University of Milan and the Don Gino Rigoldi Foundation. The experience provided exposure to university life through academic orientation activities, interdisciplinary workshops, and guided reflection on future study and career paths.

Engineering Workshop – Università degli Studi di Brescia

Participated in a one-week STEM engineering workshop held in collaboration with the University of Brescia, hosted in engineering laboratory environments. The program focused on biomechanical engineering, mechanical measurements, and applied engineering principles through hands-on laboratory activities.

Worked in team-based projects involving the development of interactive systems using sensors and microcontrollers, 3D printing of mechanical components, and basic programming for motion detection systems.

COURSES

"Make & Display" Course – Istituto Antonietti Unlock Program (2023/24)
G. Antonietti Upper Secondary School of Education

Course focused on 3D printing, including basic design, preparation of digital models, and use of 3D printers.

Python Programming Course – Istituto di Istruzione Superiore G. Antonietti (2024/25)
G. Antonietti Upper Secondary School of Education

Introduction to programming with Python, covering basic coding concepts, logic, and problem-solving through practical exercises.

CAD Mechanical Design and 3D Modeling using SolidWorks – Istituto di Istruzione Superiore G. Antonietti (2025/26)
G. Antonietti Upper Secondary School of Education

Course focused on mechanical design and 3D CAD modeling using SolidWorks. Covered the creation of technical drawings, 3D parts, and assembly design concepts for mechanical applications.

INTERESTS

- 3D design and CAD modeling
- 3D printing technologies
- Embedded electronics (Arduino, ESP32, Raspberry Pi) and robotics
- Mechatronics and automation systems
- Piano and music

SUMMARY

Technical profile focused on mechanical engineering, mechatronics, and CAD design. Experience with SolidWorks and other CAD tools through school projects, internships, and technical workshops. Interested in mechanical systems, electronics, and automation, with practical exposure to 3D printing and embedded systems. Motivated to continue developing technical skills in engineering.

SKILLS

Technical Skills

- SolidWorks (3D CAD modeling, assemblies, technical drawings)
- Autodesk Fusion 360
- Autodesk Inventor
- AutoCAD
- Mechanical design fundamentals
- Basic understanding of manufacturing and workshop processes

Digital Skills

- Microsoft Office (Word, Excel, PowerPoint)
- Basic programming
- File organization and digital workflow management
- Basic IT troubleshooting (school level)

Soft Skills

- Adaptability
- Willingness to learn
- Problem-solving
